

Hello Coaches, Managers and Parents. Happy 2024!

We are approaching the start of games for the upcoming soccer season and I wanted to reach out with a couple of concerns.

Over the past couple of winters, especially last year, we had several incidents involving children of spectators running around inside Fox Hollow and getting hurt, blocking the air vent, and putting things they should not down the toilets which, in turn, cost thousands of dollars to repair. With golf simulators there is a chance for injury if you do not watch your children either from them opening the walls of the sim or just walking/running behind a golfer. Last year we had 2 children cover up the air vent inside. This caused the dome pressure to rise and over inflate. Had my staff not caught it it could have been a very bad outcome. There are so many things that can be helped just by watching your children.

We would like to continue to allow spectators but, your children must be supervised and kept with you at all times. If this becomes an issue again this year, we will have no choice but to no longer allow any spectators.

Thank you.

Cathi Geerin

Manager, Fox Hollow Sports Dome
